**“ I’ve Tested Almost Every Ice Cream Maker on the Market—  
This One's the Best ”**

*“ I’ve spent the last several years testing and reviewing kitchen appliances, and have thoroughly evaluated almost every ice cream maker out there. I’ve never been tempted to make any a mainstay in my tiny kitchen up until recently, when I tested the Whynter ICM-15LS ”*

*“This product’s a standout for several reasons. First, one of my biggest complaints about ice cream makers is the amount of space they can occupy – in addition to the unavoidable counter top real estate, most models also demand significant freezer space for the insert bowl to pre-chill before you can start. The Whynter, on the other hand, is a self-refrigerating compressor machine, which means that it’s self-contained and no pre-freezing is required.”*
